

Unmanned Regularity Start Controls

The event has unmanned time controls at the start of some regularity sections. RS1 and RS5 will not be manned (there may be others), but will have a Control Board saying “Unmanned Regularity. Start”

1. You will be required to record your regularity start time in the correct box on your time card.
2. This can be worked out from your time schedule at the front of your road book.
3. The time you record will be signed for by the marshal at the first ITC of the section. If the RS time is blank, the marshal will strike through the RS time boxes and you will have been deemed not to have visited the RS Control. You will therefore collect the appropriate penalty for a missed Time Control.
4. Please remember that you have at least two miles before the first ITC in any regularity section on the public road.
