I trust you enjoyed the 20 mile route in Gloucestershire.

As explained at the start, it is not a race and you had until 2200 to get to the finish without penalty. And you all managed that easily.

Most of you missed the short piece of white road at Barbar's Bridge - it's about 30 metres before hitting the B road at Tibberton.

I have deleted the penalties for the board near Lawn Farm (VOO) as I found it a few feet away when I collected them all in afterwards.

New territory, but the same old style of event. I hope it gives you some practice before heading out into our NavEx's.

The next one of those is on 21st February, which is designed by me to be Novice-friendly. Hope to see you there.

There will be another Night Nav in the autumn, and I'll let you know a date nearer the time.

**Simon**
