I trust you enjoyed the 20 mile route in Gloucestershire. Also, that the event gave you an insight into navigating in the lanes at night.

The PC29 board (CAO) in Bradford's Lane had gone missing when I collected them after the event. All the rest were still in place.

As explained at the start, it is not a race and you had until 2200 to get to the finish without penalty, and all of you managed that quite easily. Though I suspect George and Wez cut the last few miles to get to the finish within the time

There will be another Night Nav in the spring and I'll confirm the date to you all in the New Year.

**Simon**
