I trust you enjoyed the 20 mile route in Gloucestershire. Well done to the three crews who found all the boards.

All the boards were still in position when I collected them after the event, so none had gone missing, Even ZX was still on its post.....

The Shotts Lane codeboard (N6) would have been found if you had taken the WSW departure from the crossroads in at NNW 684¼ 249¾ WSW

My apologies for putting codeboard 63 on the wrong lane near the finish. The plot was right, just me rushing to finish before you caught me again.

As explained at the start, it is not a race and you had until 2200 to get to the finish without penalty. And you all managed that in time.

There will be another Night Nav in the spring - maybe 27th January - but I'll confirm the date nearer the time.

Simon
